

Dear Bill,

6/5/97

Please excuse the delay and the haste. I've done a short book on that miserable Permit Hall and his writing and speaking. It and weakness have kept me from doing more for several weeks.

Those address labels were made by Dennis. I misunderstood when I saw them and thought they duplicated some return address labels I'd been given. When I took a good look at them I started using them. I imagine that if Dennis is not back yet he will be soon.

Herring got a little attention in the Wx Post, too. Legitimate criticism but understated.

I hope that Limbaugh and his like are all running out of steam. They deceive and mislead so many who do not know what is going on and believe them.

In your 5/28, the epilogue for Waketh is being retyped. It may interest you to know that the student who is doing it told me that after retyping its first chapter she sat down and read it.

When I see what happens in those races you like so much I get even more turned off about them. I wonder that so many survive some of those "accidents"

I don't know about Rockstool. I also don't know why the FBI fired him or his basis for suing them. He'd written saying he had to come to DC from time to time and would like to come and give me this picture he had. The picture was taken by Fred Newcomb and Fred's son gave it to Rockstool. He sent me the picture at my request. He may have had a genuine subject interest. Don't know.

Best to you both,

Hervey
