June 24, 1997

Dear Harold:

I have not heard from you for a few days, so I hope you both are well. My father is much better, now if I can ever get my clients or other lawyers to answer me, I'll be OK.

"Turning Point", which I taped and will send you along with the other tape I promised you, did a very good job on Pepper and the King family. Essentially, the program took the position that Dr. King was very likely killed in a conspiracy, but not by the Govt. like the King family and Pepper seem to think.

As usual, you are right and Dexter King would be better off listening to you. He actually said he thought LBJ was involved. The program was very well balanced, but did support some type of conspiracy. I enclose a WSJ article.

The WSJ article was written by the same woman who criticized the "Men Who Killed Kennedy" some year or so ago. I wrote in response, a real middle of the road letter, but no publication. Which I am getting used to!

You can see the bullshit artist in Pepper coming out under questioning.

John Stossel, ABC talking head, spoke to the Bar assoc. last week. I asked him his opinion of NBC paying Richard Jewell \$500,000 for Tom Brokaw running off at the mouth and implicating he was in fact guilty. Stossel seemed unaware of it! Then, he said news people often take the word of the FBI. I asked him why, with their track record the last 30 years. That got a laugh from the other lawyers. Then, he tried to defend Brokaw by stating that there is no proof that Jewell is in fact innocent. So, I pointed out that the FBI now says he is! That seemed to befuddle him. Another example of an airhead millionaire newscaster. Then, he implied that all breast implants were safe, and only the greedy plaintiff attorneys thought otherwise. This so incensed the dean of Uof L Law School that he rose to defend trial attorneys. I was proud of him.

Otherwise, it is hot and humid and I am working on the pool. My new career. I think owning a basketball hoop would be easier.

Well, write soon and I hope all is well: We continue to have rain and the ground is soaked. But we are dry.

Bill
