

Dear Bill,

6/26/97

Reur 6.24, glad, very glad, your father is improving. Wish I could say that for myself.

I've put the enclosures aside to read when I rest on arising in the a.m. But if I knew he'd be here, ^{where} he to come when I'm not as exhausted as I am now I'd like to talk to that guy at ABC who believes there was a conspiracy in the King case.

Jerry volunteered to retype what I've titled Bogus Revelations, after the Hall title. I've read and corrected it and today he took it back to make the corrections. He has questions about some of the details ^{as massive} included as proof but he believes that I left little of Hall and that what I wrote will probably be as close to what Whitewash was on the Commission about this board. Which was one of the reasons I used more proofs, all of official origin.

In time there will be a disk for you and ~~others~~ others.

I had not finished that when I got the dozen chapters of the Waketh epilogue. I've gone over and corrected only three of them.

Or, I'm staying as busy as I now can.

We had a record-breaking scorcher yesterday, with heavy storms just around us but not hitting us. I did get the car A/X fixed just in time!

If you think that ABC guy who believes there was a King conspiracy would be interested, he'll be welcome if he decides to come if he makes it in the morning. Frankly I do not believe that any of the nets will report factually on the crime but how nice it would be if one did! *If I write they'll think I went something.*

I do not believe the King family will have learned from this experience. They did not with similar earlier experiences and people. I feel sorry for them. I think I told you that I wrote Dexter. No response of any kind.

One of the many deer that stay close by dropped two foals within the past week. We like seeing them frisking around.

Best,

Jack
