

Critics Still Doubt Sayer Was Alone

By MARTIN WALDRON

NEW YORK, Nov. 21—The Warren Commission's report that Lee Harvey Oswald was the lone assassin of President John F. Kennedy has not convinced many critics. In fact, the report has only strengthened the doubts of those who believe that the assassination was part of a larger conspiracy.

Among the critics is Dr. Weisberg, a retired general in the Texas National Guard, who has won national honors for courage in obedience. He estimates that 100 to 200 people are still working to prove that Oswald was not the lone assassin.

Mr. Jones is the developer of a theory that there is a conspiracy in the United States to murder everyone who has any pertinent knowledge about the Kennedy assassination. Thus far he has compiled a list of 72 suspicious deaths and says there may be more than 100.

Mr. Jones tends to agree in principle with New Orleans District Attorney Jim Garrison that President Kennedy was killed by the Federal Government with the complicity of the Federal Bureau of Investigation and the Central Intelligence Agency and at least the tacit approval of the late President Johnson.

Mr. Weisberg, who has published four well-received and carefully researched books about the assassination, says that the circumstances of Mr. Kennedy's murder cry out conspiracy. He says he views the Warren Commission investigation as a "whitewash" the name he gave to three of his books.

Most of the doubt about the Warren Commission's finding has been based on conflicting statements by witnesses. But these views have been backed by recent tests by scientific investigators.

Dr. Cyril H. Wecht, coroner of Allegheny County, Pa., (Pittsburgh) said last year after studying autopsy material that had been kept secret for almost eight years. "From a hard physical evidentiary standpoint, there was more than one person shooting. The single-bullet theory is absolute nonsense."

The Warren Commission concludes that one bullet pierced President Kennedy's neck, went through the chest of then Texas Governor John B. Connally Jr., and then on through Mr. Connally's wrist into his leg.

"Once that theory is destroyed, we must conclude that more than one person fired," said Dr. Wecht, who is past president of the American Academy of Forensic Sciences.

A theory that President Kennedy's assassination was arranged by munitions makers has been made into a movie, "Executive Action."

Mr. Jones said the other day. Mr. Jones, who is a retired general in the Texas National Guard and who has won national honors for courage in obedience, estimates that 100 to 200 people are still working to prove that Oswald was not the lone assassin.

"Once that theory is destroyed, we must conclude that more than one person fired," said Dr. Wecht, who is past president of the American Academy of Forensic Sciences.

A theory that President Kennedy's assassination was arranged by munitions makers has been made into a movie, "Executive Action."

The movie is based on a novel by Mark Lane, a New

York City lawyer who was one of the early critics of the Warren Commission and who published a book, "Rush to Judgment," which was critical of the commission's investigation.

Among the majority of Americans either convinced or open to the idea that others besides Oswald were involved in the assassination—64 per cent in a Gallup poll released in January 1967—was President Johnson.

Leo Janos, a five magazine writer and a former Johnson aide, said that President Johnson had told him a short time before his death that he had never believed Oswald was alone.

Writing in The Atlantic Monthly, Mr. Janos said that President Johnson had told him that a year or so before Kennedy's death, CIA backed assassination teams had been picked up in Havana. Johnson speculated that Dallas had been a "refueling" for this thwarted attempt to kill Cuban Premier Fidel Castro.
