omedical Research Budget Cuts Hit

By Stuart Auerbach Washington Post Staff Writer

NEW YORK, Nov. 30-The man that President Nixon picked to oversee the nation's war on cancer attacked the the total federal budget for cer program even though that program had received an increased budget.

cancer pro-"Neither the gram nor biomedical research generally can thrive" if budgets for research in basic sciences and metabolic diseases are cut, Benno C. Schmidt told a conference here on cancer virology and immunology.

"At the time we were urging on the Congress and the administration a greater effort 1974 budget. on cancer, we were explicit in the expense of other biomedical research.

one, did not believe that fact, have taken place. would happen," said Schmidt, The fact is," he continued, nounced a \$30 million pro- at least \$500 million.

Mr. Nixon two years ago as this time.' chairman of the President's Cancer Panel.

Nevertheless, the total budgets for the National Institutes White House today for cutting of Health-except for the cancer and heart institutes, the biomedical research. He said two presidential favoritesthese cuts are hurting the can have decreased over the past three years. In 1972 the budget research totaled \$878 million for non-cancer and heart. In the president's 1974 budget, he allocated \$767 million for those programs.

The budget for the National Institute of General Medical Science, which does much of the basic research needed to find the causes of cancer, dropped from \$166 million in 1972 to \$139 million in the

"I am not at all sure that the position that the increased the cancer effort has been the cancer effort should not be at cause of the other institutes getting less," Schmidt said, panel." but it is difficult to prove to "I must confess that I, for the contrary when the cuts, in
