Walsh in my name. I sent all theothers to whom you introduced me copies of PW. I got a reaction from not one. This time I will have pictures that are pertinent, a few lending themselves to detective-story handling, and an endless supply of documents. I think it is possible, as I did before, to give each show that will have me something different. By the way, I also know Steve Allison, for whom I did several shows when he was at WWDC, Washington. It is on his show that I first challenged Schiller to face me, with a control by means of which I could stop his record at every lie and distortion. Allison is a toughie. My rage when I heard those slanders of my friends for the first time was so towering, my tongue so sharp Steve backed off and wouldn't fight. He got on my side and stayed there, although I had heard him earlier that night saying just what would happen to me. I thinkhe'll have me on his radio show.

I have never made any additional approach to the Time-Life Bakersfield station, fellow named Winston, who lastt year wanted to fly me out. He has an idea Oswald was an agent, coming from a kook friend who had been an intelligence office at the Moscow embassy. Only he thinks a Russian agent.

I'll have to be finding a lot of time to be making clear photocopies of the things I'll be taking. Glad to havethat 3M machine now. If any of you has any special interest in what you'd like me to bring, please tell me. I expect to have one bag of documents, pictures and tapes, that Old leather one of mine that accordians out. I hope to be able to go over the "icbeler tapes you have sentthe and dub out nicehunks to play and comment on.

Mail time. Nothing new except that Shirley Martin's Vickie was killed in an auto accident. Best to everyone,
