King assessmention records appeals

CHD -King/FEI report

Files not scarched?

Records without file numbers?

7/30/80

The CHO provided a copy of the so-called Murphy report, preliminant to the OFR report, covered by a separate memorandum of 4/9/76, from the AAG, J. S. Pottinger.

There either is no file number on it or, if there is a file 270-36-1980, I recall no other records provided from that file.

This number appears under the typed-on classification authority notice, attributed to JSF and is directly under it. It is in what appears to be the same henduriting.

If this is not a file member, then there is no accounting of the source of the record from which this is copied.

It then would appear that CHD has its own files and that they should be searched, as I've saked before, for compliance.

The records that are the basis of this report have not been provided. Ferhaps the Pottinger sems was done with no other raw natural than the hurphy report but for the 51 detailed pages of the Murphy report there must be other and pertinent records.
