Dear Clay,

The misaddressded chapters mailed priority made best time getting here, but I am not recommending misaddressing because it might hit a postal clerk not as cooperative and and one who does not know or know of me. We have not had the foute 8 address for more than 20 years nand I wonder where you got it. When PM was done in 1975 the address was Noute 12 and before 8 it was 7. Then they gave us a street address which is in my stamps and labels. Anyway, the package was here yeaterday and you have my apologies for not thinking that with Dave not having sent you the disk or a printout you had no idea what the next page is. It is 155.

If anything like this happens again is it helpful to have even temporary page numbers. They make reference possible.

Brief because we've just returned from Johns Hopkins with the good report that there is no sign of cancers on the ear from which it was removed. But in other ways not all that good. I'm tired and weaker. Second day of that. But although yesterday got that way suddenly and for no apparent reason and I was that way getting up this morning. I had no real thouble in my supermarket walking at 4 a.m. and no trouble, although I went very slowly, pushing Lil around the Hopkins outpatient building beginning about 8 a.m. In a Whill Main.

When you phoned Sunday Dave had just left. We returned to Wisconsin yesterday. He was interviewed on the Zapruder film by People m gazine but they wanted him to put a dollar price on its value and he would not do that. Mostly they want things their way, so maybe they won't use him. We'll sec.

Thanks and best,

Horse
