

On 11/22/63 Marina gave the DPD a signed statement that LHO owned such a rifle.

I know of no such statement. I know that Marina was saying the opposite when the Secret Service was sweating her two days later, 11/24 (WW II, Scheherezada) and I doubt that even the Dallas cops would have run such a fifth-amendment risk while Oswald was still alive and would have had a lawyer to scream about it.

I take it that the last graf is the one Katz exaggerated beyond reason on GMA. I don't believe any part of this.

Nobody in his right mind would sight a rifle in where there were so many people or where the police could circle and get back to that point. This also indicates a lack of knowledge of sighting in a rifle. As I remember it is necessary to do this in lining sight up, that is be where you can fire the thing, only for firing to adjust sight. Other kind of sighting can be done without firing and indoors. This kind, and hardly anyone would fire the thing in or hear Dealey Plaza, could better be done at a range. This report does not connect the silhouettes with the old car -or the men with it for that matter. And how many places are there near the scene where the police car could "circle?"

No wonder Katz had to jazz it up.

If there was anything I believe none of this account.
