Harold Weisberg

misled until today, the following pages from CD 6 seem to have  
significance:

454-9 (the marginal markings are mine). Beginning with the assumption<sup>c</sup> that Oswald was not always fully truthful in his autobiographical writing, there remains the question, why was he not? Also, it is not necessary to assume he was always untruthful.

On page 454 he says he approached Latin-American consulates in New Orleans. Perhaps. But I recall no investigation - and I do recall Skew's non-explanation explanation of Oswald's selection of the ITM, the presence of the consulates.

On the same page, remarkably, assuming this to be a genuine document, he says that he tried to "infiltrate" the DRE. With no local member but Bringuier, that would have been quite an accomplishment. However, knowing he was the only local member, Bringuier used the same word to describe this. That is true, whether or not he is the one who did it (and his use of the words "N.C. city Attorney General" makes me wonder - did he not know who he phoned?\*) Oswald here takes credit for the harassment of Bringuier. This has to be after he "infiltrated" and before the Garaci incident. In short, indication he met Bringuier more than once.

456: He says he was interrogated by the police intelligence unit but, remarkably, does not mention the FBI.

And on the same page he says his August 16 operation was "a four<sup>nti-</sup>men demonstration". After him and Steele, this leaves two others to be indetified if true. It is consistent with uncorroborated reports I have. Odd, also, that he seemed not to know of the WWL-TV filming and presentation.

458: He says he learned Russian "during my almost three years residence in Moscow and Minsk". This is false, for he spoke Russian in the Marines. Bracketed with his omission of the FBI cited above, it makes me wonder if his purpose was to hide federal interest, involvement, etc.

463: It was not possible to connect him with any left-wing activity in New Orleans. f

The reference to the date of the search at the Paine residence is false, knowingly false, and made to be consistent with the falsification of the other records, which I have.

466: Marina's "feeling that you will lose me" does not sound like the complaint of a wife denied conjugal blessings! She might be asked, if she is a witness.

471: Someone before me, presumably on the Commission staff, marked the bottom item, in which Oswald sent Marina "a photograph I made at work". I wonder if it is the picture of him with the rifle, for example?

If Gary and Paul have any ideas from the above, I'd welcome them.
