

JDW: Your mailing of 9/3, with enclosed clips and notes of 9/2 and 9/3, come at a time of the most welcome of generally unwelcome time pressures. Howard brought with him a friend who is a proficient touch typist and I'm about to be forced away from this machine so he can start typing on it the notes for the appendix on which Howard hasx been engaged for two days. Small as this type face is it is comprehensible on reduction and makes otherwise impossible f'notes possib.e.

When it outs I'll have to get the new Buckley book!

It is like ESP on the new Texas doings. I've sent or include some aspects.

Not only does it look like a pre-emptive campaign but there remains also the still unclear Securitu Associates Internation ploy, leak this week (to Earth News) saying the FBI was in on the offing.

As ~~xxxx~~ of this moment pressures preclude rearranging the clips I have for copying. JL is going to see if he can get those papers from the DC newsstands. If he does he'll rearrange suitable for xeroxing. But I have those to 9/2 and expect others if they are not provided/ by JL. I expect my sources to continue to sand clips.

Clue that may not be clues but possible indications of orchestrations are the fact that the Dallas and Houston papers used facsimiles of two different two-page letters that in each case are reproduced as on-page when they are too long for that but would fit a single legal-sized xerox sheet. Neither was cramped for space, neither was from an original (I have the originals, they the remaining carbons) and both appeared within 24 hours.

Both also managed to eliminate relevant info and documents.

One of my sources may have his own complications.

One other possibility that ought not be forgotten is that this stems from CIA countering of FBI ~~ga~~ screwing of CIA. In these parts only FBI is the target and in each case it is a very old story or one that could easily have been leaked years ago.

The cross-country vibes are on the same frequency. I hope my immediate needs permit keeping up. Thanks and best, HW 9/6/75
