8/9/93

Dear Dave,

As I may have said, I've come to use more than I'd like to the right I spent 80 years earning, to forget. I've forgotten what I wrote that you respond to under the date of my 51st wedding anniversary, 8.3.

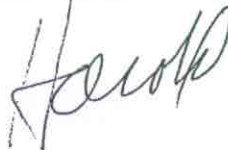

I understand that review copies of the Callahan production are available. I've not seen it. We need that like other holes in our bodies. Without seeing it I am certain I can guarantee it is an atrocity, a commercialization and an exploitation. Ignorant, too.

I think I was referring not especially to his but to any of those sad commemorations, mostly for a separate file on that commemoration for the future and possibly for my writing. Whether or not I publish it I am interested in anything that certifiable Livingstone does, says or publishes. ^{His} ~~It~~ is to include an attack on me. You can gather how undependable he is from my tongue in cheek to Carroll.

You will not be able to resolve for yourself any factual matters from the readily-available books, past, present or future, as mentioned in FW.

And even the best intuition cannot be dependable without a solid foundation.

Again, thanks,

Dear Harold,

thanks for the note & enclosures of 7/9/93. As you could forsee, most likely, I found them fairly upsetting — the RFK position in the Congressional Record, the Harrison Livingstone business from your letter to Kent Carroll. I am not grounded in research, or even ordinary logic (I'm an intuitive kinda guy) so could not resolve for myself the factual matters. Nor have I read Mr. Livingstone's book(s). But I did begin to grasp the rather disillusioning situation.

2.
I assume that you are dealing
with these matters in your, or one
of your, new books..

Bob Callahan's book ("Who Shot
UFK?") will not be released til
November, so the potential influx
of material has not begun to come
to me. Nothing to report, at my
end.

David
