Larry, America's 3/7 story on CLA police training confirms the instant analysis that I gave you, that your cons had to have been among those involved. It ands to what I know in abowing the optioring of the spooks through the larger police departments. It may or may not explain my first inkling. I know a detective who in his training (No did not say by the CIA) ne sew and studied the Zaprulor film, movie and alidos (I discovered the CIA's desire for a copy of the tilm long before this recently-reported period and published in Photo WW). Studying that is hardly the usual police work, nor was it severed by any of the of lotal explanations. This story adds to what was taug trains clandentine photography. Well, maybe, anyway, your than H.T. Smith got such training. May not to the studied the Z film but shy he studies it. I see the you salt, began by an affirmation assignation of imposinge.
