Follows och interst that follows what I quote Lesar as saying, that Posner admitted to him that the case is not closed:

Outling M CML b not Closed - 2

Depi Despite his knowing and admitting that the case is not closed at all, Fosner that claimed to David Dudley, as Dudley wrote in the Baltimore City Paper (issue dated 11/26-12/2/1993), "But there is a reevaluation taking place among opinion makers....

The burden of proof has shifted tack. The time is here when we can say, Where is the evidence?" (excission in sriginal published report)

As Posner knew only too well, the polls said the exact opposite.

His book and the exceptional attention to it, it is worth repeating to each of his knowling untre claims and representations, convinced people that he and it and the official story are all wrong.
