Dear Ms. Holt,

I've been sent a copy of your 9/5 review of Posner's book and your story I presume of the same issue of your "Between the Lines" article headed "Assassination Enigma Endures." What is in your story has not been reported around here and it interests me much, I hope it is not asking too much to ask if you will be kind enough to send me what coverage of that Trial Of Lee Harvey Oswald your morgue holds. I ~~just~~ wrote Failure Analysis and have not yet gotten any response.

I have most of a book on this Posner/Random House rewriting of our history and their imposition on the trust of much of the world. I would like what I ask of you for use in this book. I'm rushing it. As much as an 80-year-old can when in poor health and feeble.

I am the only one of those writing about political assassinations who is not a conspiracy theorist and does not theorize in my writing. I've published six books on the JFK assassination and have a seventh being prepared for publication. My work comes entirely from the official evidence. By a dozen FOIA lawsuits, some precedental and one leading to the 1974 amending of the investigatory files exemption to open CIA, FBI and similar files to FOIA access I've gotten about a third of a million pages of once-~~with~~ withheld records. I now make ^{them} ~~them~~ available without charge or supervision to all, including rascals like Posner, and they will be a permanent free public archive at local Hood college.

Even if I do heard from Failure Analyses those clippings, and any other of which you may have copies available, can be useful in my writing and should be of value in the archive I leave.

Please ^{pride} excuse my typing. It cannot be any better. And congratulations on being more perceptive than most reviewers even if your trust, too, was imposed upon. Referring to Posner as "Varrigant" is to praise him. But few did that. And what he led you to believe is new really isn't except for his twisting of it.

Thanks for anything you can do and best wishes,

Harold Weisberg
