

Quiroga file

To Quin Shea from Harold Weisberg, JFK assassination records appeals 6/25/79
New Orleans and FBIHQ records - Carlos Quiroga

Attached is the Airtel part of 62-109060-5114, without the Bringulier-Quiroga propaganda listed in it. I appeal the withholding on page 3 and the withholding of the name, which I believe may be that of Carlos Quiroga. (The FBI made voluntary disclosure of Quiroga and Bringulier as its sources.)

By rational standards these are crazy people. Their political beliefs are crazier still, as in regarding David Ferris, who was of the right extreme, as a Communist.

Quiroga made himself very much of a public figure, as did Bringulier, before, during and after the Garrison so-called "probe." Both precipitated the fight with Oswald/^Wwhich got Oswald much publicity in New Orleans (used in Mexico). If you want details the FBI or I can provide them.

Quiroga also told the FBI what he suspected Garrison was up to with regard to him and the FBI has disclosed this.

He and Bringulier knew of the Garrison so-called investigation long before it was public knowledge, which can account for the interest in a nut as an informant, page 3. Bringulier was in touch with the FBI well in advance of the first Garrison publicity, whether or not Quiroga was, as I now can't recall.

The FBI carried Quiroga with a T number for a while.

I doubt there is anything in the withheld part of page three that is not within the public domain, at least the FBI never applies.
