New Orleans and FINEQ records - Carlos Quirogs

Attached is the Airbel part of 62-109060-5114, without the Bringuler-Quiroga propaganda listed in it. I appeal the withholding on page 3 and the withholding of the name, which I believe may be that of Carlos Quiroga. (The PRI made voluntary disclosure of Quiroga and bringular as its sources.)

By rational standards these are crasy people. Their political beliefs are craster still, as in regarding David Ferrie, who was of the right extreme, as a Communist.

Opiness and after the Carrison so-called "probe." Both productated the fight with Oswald/which got Oswald much publicity in New Orleans (used in Mexico). If you went details the FBI or I can provide them.

Quirogs also told the FMI what he puspected Carrista was upt to with regard to him and the FMI has displaced this.

He and Princular knew of the Garrison co-called investigation long before it was public knowledge, which can account for the intervet in a mut as an informant, page 3. Beinguier was in touch with the FSI well in advance of the first Garrison publicity, whether or not Quiroga was, as I now cen't recall.

The FMI carried (mirogn with a T number for a while.

I doubt there is anything in the withhold part of page three that is not within the public domain, a test the FMI never applies.
