Hi-

I am a researcher/collector of JFK, assassination, and general. I am well aware of your stature, and just wondered whether or not you publish(ed?) a newsletter. *no*

I greatly admire the time and energy you have spent on this subject, from all the FOIA's, to the books, to the interviews, etc... I am also looking forward to spending time and energy on this, and if ever the occasion arises that you need an assistant in Los Angeles, please consider myself, and do not hesitate to write (or call).

I have all of your JFK works. I especially like Post-Mortem. In the first Whitewash that you published, I have 2 copies WITHOUT the index, and 1 with (in addition to the DELL copy). Were these two different publishings, or just a mistake on those without the index (ending abruptly on p.208). *TTT had not yet been written*

*any of have but I am not able to search for the copy myself*

I have read that many documents are available through you, among those, the over 200,000 pages of FBI files (???). What is available to me? My main interest is the body, as I feel, like many, that there are still many clues here that have remained uncovered. In addition, I would like to ask you if have a "Weisberg" JFK-assassination-related bibliography that would be available to me. *more. But if research files published on by with wire*

I am trying to find the 2 Articles by Wecht (Forensic Science 1974, and Modern Medicine 1972), in addition to the Lattimer Article (Resident & Staff Physician May 1972). Do you have these & can you supply me with xeroxes? What about the 1982 N.A.S. study? *don't have*

I have many questions encountered during my research, and hoped that you'd be amenable to a dialog in letters. Thank you in advance for the time to read and even consider this. For your convenience, I have enclosed a S.A.E. *in 75 + not well*

Here are a few questions- Are there any plans to have a computerized network of research? I am planning to write a book on the subject and am, needless to say, fascinated, as we all are, and would welcome any feedback you could provide. I have many questions, and wonder if a "researcher's society" exists to discuss newly brought to light facts. I figured you'd know. *not now for info*

*action!*

For instance, I recently saw on a talk show, the already overviewed autopsy photo of JFK's back, and this particular show had taped two triangles of paper labeled "1" and "2" to the area of the photo that showed JFK's lower back.

The triangle labelled "1" pointed to the lower back shot we are all aware of (except the Warren Commission), but "2" pointed to a black spot near (lower & to the right) the first one! It SEEMED that they were making reference to a "second" lower back wound, one that I have heard no reference to anywhere! And stranger still, THEY DID NOT REFER TO THE SECOND TRIANGLE AT ALL, except indirectly, by calling the first wound "number 1" they implied there is a "number 2".

I went to my many copies of this photo (in High Treason, Best Evidence, etc...) and it DOES look like a second entry wound below and to the left! Later, GLOBE (a cheap 'Erquirer' type tabloid) repeated the info about the second bullet hole. Interesting, no? *-no- but "information"*

*I do not know the answers*

A second question relies on your gunshot knowledge. Many, including Connally, described a 'fine mist' of blood & brain tissue. Can this be the result of a NON-explosive bullet (even if a hollowpoint), or does the 'mist' ONLY result from an explosion of the bullet? To my untrained "bullet-logic", a regular bullet should fracture, cut, and tear, but to pulverize and disintegrate ("missing brain"), doesn't that require an explosion? If so, that ONE point, of course, destroys the Warren Report. In fact, I am sure all of us would be satisfied, for now, with JUST ONE INDISPURABLE FACT, that causes the Warren Commission's claims to be truly IMPOSSIBLE. As you know, in the HISTORY books in schools, it still says OSWALD was the lone assassin. There was NEVER evidence beyond a shadow of doubt to this effect, and it is a shame we have to 'unprove' the Warren Report conclusion, instead of 'proving' the real truth.

*Because the doctors would not we cannot depend on what they said there is no fact at all in fact for the theory.*

Another question relates to how NAVA claimed that the autopsy photos NOT published, but seen by the Parkland doctors in 1988, DO show a hole in the BACK of the head, and that the one photo of the back of the head, that does not show a hole, has the scalp pulled over the hole" (DR. McClelland). What do you make of these points?

(Next page, please...)

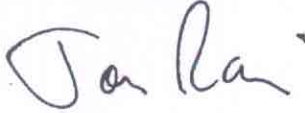

*What is being published is not "information" as shown, mostly interesting theories*

In closing, I would appreciate any response, as I want to keep abreast of all the current updates in information. It has been a pleasure to write to you and I hope to hear from you. I lived in Towson, MD. on Nov. 22, 1963, and hope Maryland is still as green as it was in then.

Thank you very much for your time,  
Sincerely,

Jon Rami

P.S. Do you have Nix, Muchmore, Willis, and Zapruder (especially sprocket-to-sprocket) color stills or video, with different panning and blowups, and other films and/or videotapes or any JFK-related material? Please let me know of anything you can supply me with, and thanks again!

*no*

Finally, do you have any sources for me to purchase any of the following books (besides The President's Box, Tom Davis, and Last Hurrah):

*-no- only ones of which I know*
