Dear Sol,

Last time I saw you, you accurately called the shot on the Supreme Court decision. Congratulations!

Since then, in addition to many other things, like another 15 investigating days in New Orleans (and its been only a month and a week) I've written another book, on all the recent assassinations. In connection with it I drew upon a fairly considerable amount of material I had on the so-called "National States' Rights Party". I have been interested in them for a long time, but I am interested in so much it is difficult to do as thoroughly as I'd like on any!

So, if your people are interested in what I have, they can see it and have copies. It includes real Hitlerism by J.A. Milteer, like this comment after expressing immediate satisfaction with the JFK murder:

"We must not concentrate on the Jews". He accurately and in the most exquisitely fine detail forecast and described the real thing less than two weeks before it happened. I also have the name of the man he expected to do it, and that fits unpublished material on the King assassination.

If you have any material you can let me have on these Nazis, I'd like to have it, for I'll be sending that manuscript and adding a few things as soon as I can. I have only just returned from New Orleans and am cleaning up the accumulated odds and ends. I also have informal dossiers from collaborators on a dozen or so of the top NRRP leaders. I also understand that they have the Benister-racist files-from a friend of Benister's.

While we have been clobbering Bringuer in court on his frivolous suits against Bell, Saga and me (he has never even tried to serve me), Canyon has been negotiating behind my back for an insanity-withdrawal of Oswald in New Orleans, in which there is neither error nor libel-and no error even alleged. Wild! While Bringuer is trying to withdraw the one suit and we oppose it successfully (the judge gave them hell on that just today, my so-called "liberal" friends are making silly and unnecessary deals behind my back. What a world and what exalted principles people live by!

Best to you all.

Sincerely,

Harold Weisberg
