Hay 5, 1966

Mr. J. Lee Rankin Cirporation Counsel City of New York New York, N.Y.

Deer Mr. Rankin,

Today's New York Times quotes you are saying that criticism of the Report of the President's Com ission on the Assassination of fresident John F. Kennedy will prove to be "superficial and without proper consideration of the material that is available to everyone in the report and the supporting volumes." It also quotes yourse saying you are "well satisfied that no valid attack has yet been made" of this Report.

From these quotations I presume you have not yet read my book WHITEWASH: THE RELORT ON THE WARREN REPORT, so I send you herewith a copy.

As you will see, this book is not superficiel, and as you wil also see, it comes entirely from these supporting volumes. To far from superficial was my work that my typed notes also total a third of a million words.

Because this book was completed almost a year and a half ago, I would like you to show me wherein it is either superficial or not a valid attack. And if there is anything you can honestly say was without proper consideration of the exhibits and testimony, please also call that to my attention.

Reality is exectly the opposite. It is the staff of the Commission that, in preparing its Report, was superficial and did not have proper regard and consideration for the testimony and exhibits, and this is exactly what my book, by quotation of that very evidence, proves.

If, after reading my book, you believe I am wrong, please let me know how. If you cannot do this, may I call upon you to join WHITE ASH: THE REPORT C THE WARREN REPORT, in its demand for a full and entirely public siring?

You end your them and now assistant Mr. Hedlich are also quoted by the Times as saying that the "sc-called" FRI report was evaluated and discared by the Commission. It was then the belief that this was to have been a definitive report by the nation's pre-eminent investigative agency. Especially with regard to such a truly momentous and historic event as the assassination of an American President, are you accusing the FRI of such gross incompetence or wanton disregard for the most obvious and visible evidence that it could not see where the President was wounded when it had two agents with his body throughout the sutopsy?

Sincerely yours,

Harold Weisberg

# Warren Report on Assassination Challenged Again

A now-declassified Federal Bureau of Investigation report is being used to mount new challenges to the Warren Commission finding that said Lee Harvey Oswald was the lone assassin of President Kennedy.

J. Lee Rankin, the commission's former general counsel, and Norman Redlich, who was his deputy, say the so-called "F.B.I. Summary Report" was evaluated and discarded during the inquiry. They contend the inquiry, headed by Chief Justice Earl Warren, relied on more direct and expert testimony.

The issue is whether a single bullet passed through President Kennedy's body and then wounded Gov. John B. Connally Jr. of Texas. The critics suggest it had to be a separate bullet that wounded the Texan, with the firing time for Oswald's bolt-action rifle so slow that there had to be a second assassin also firing.

#### Commission's Finding

The Warren Commission reported that three shots were apparently fired. It found "very persuasive evidence" that the first bullet to hit the President also wounded Governor Connally, and said a later bullet inflicted a fatal head wound on the President. One shot, it said, "probably missed," with evidence "inconclusive" on whether this was the first, second or third.

On June 29 Viking Press is bringing out 15,000 copies of a book evolved from a Cornell University master's thesis, 'Inquest,' by Edward Jay Epstein, reprinting 36 pages of the F.B.I.

report.

Holt, Rinehart & Winston is circulating a brochure on its plan to publish 30,000 copies Sept. 8 of a book "Rush to Judgment," by Mark Lane, for a time counsel retained by Oswald's mother.

The bureau's report is also being cited in a photo-offset book, "Whitewash," published personally in Hyattstown, Md., in 5,000 copies May 9 by its author, Harold Weisberg, former Senale Civil Liberties Subcommittee investigator.

#### Another Book Out

It is to be mentioned in "The Oswald Affair," by Leo Sauv-

age, correspondent of Le Figaro, of Paris, due Sept. 6 from the World. Publishing Company. It had first been described by a Philadelphia lawyer Vincent J. Salandria, in the April issue of the magazine, "The Minority of One."

These followed an Award Books paperback, "The Unanswered Questions about President Kennedy's Assassination," by Sylvan Fox, last city editor of The New York World-Telegram and Sun, out in 100,000 copies since October.

The bureau declines comment. But Mr. Rankin, now New York City Corporation Counsel, says he is "well satisfied that no valid attack has yet been made" on the commission report. He says he is confident that criticism will prove "superficial and without proper consideration of the material that's available to everybody in the [commission] report and the supporting volumes."

Mr. Redlich, now Executive Assistant Corporation Counsel says he has found nothing in the Epstein book or arguments he has yet seen on other points which would cause him to question commission findings.

Arlen Specter, now District Attorney of Philadelphia, who is credited with having developed the "single-bullet" hypothesis as the commission's assistant counsel says he has not yet seen the Epstein book. But he asserts the commission report is "solidly based on the evidence."

One statement in the bureau's "Summary Report," dated Dec. 9, 1963, says "medical examination of the President's body

revealed that one of the bullets had entered just below his shoulder to the right of the spinal column at an angle of 45 to 60 degrees downward, that there was no point of exit, and that the bullet was not in the body."

The F.B.I.'s "Supplemental Report" dated Jan. 13, 1964, notes, "Medical examination of the President's body had revealed that the bullet which entered his back had penetrated to a distance of less than a

finger length." The F.B.I. documents are in the National Archives in Washington.

## Report of Autopsy

By contrast, the report of the autopsy performed Nov. 22, signed by three military sur-geons, says the bullet had "entered the right superior posterior thorax about the scapula," traversed soft tissues, produced contusions on a lung and neck muscles and "made its exit through the anterior surface of the neck."

That is, it made entry in the upper back, five and a half inches below the right shoulder joint tip, and came out the

front of the neck.

The clinical summary notes the autopsy had been followed by telephone talk Nov. 23 with Dr. Malcolm Perry, a Dallas surgeon. This developed information that, in trying to save the President's life, "a tracheostomy was performed by ex-tending" what had been a small wound of "the low anterior

Mr. Epstein, a 31-year-old New Yorker, now a Harvard doctoral student, asserts the assassination film indicates the President and Governor were both wounded within 1.8 seconds. So, he argues, both men were hit by the same bullet, or there were two as-

sassins."

The evidence, he contends in his book, "indicates that the F.B.I. reports are not erroneous." He says two F.B.I. agents were present at the autopsy. He quotes testimony by two Secret Service agents that autopsy doctors "could not find a path for the bullet" through the President's body.

He offers a surgeon's diagram made during the autopsy and F.B.I. pictures taken the President's jacket and shirt to contend a bullet entering the back would have had to turn upward to go out the neck.

In rebuttal, Mr. Redlich says the commission study used the actual reports of F.B.I. investigative agents, not just the summary. F.B.I. and Secret Service agents, he says, were laymen who heard and quoted surgeons' discussions going on during the autopsy.

The commission, Mr. Redlich

says, used and printed the surgeons' final conclusions in their autopsy report, supplemented by the surgeons' own testimony.

### Exhibit Is Cited

He cites Commission Exhibit 903 to reconcile the diagrams and the clothing holes with the "single-bullet" theory and the assassination film. This depicts a reconstruction of the assassination, made in Dallas.

A double for the President is described as at an angle of

21 degrees, 34 minutes, to a cites working papers from a rifle pointing from the sixth former assistant counsel, Wes-floor of the Texas School De-ley J. Liebeler. pository.
