Dear Jerry, 1/5/80

Your last tape come just after the middle of last month. I listened to part of it while going to Washington on a suit I have against the FBI. The batteries went dead while driving and I then heard about half. Because most of what you say would disgrace a self-respecting boy who has not yet had to start shaving I did not waste time listening to it until I was again driving - yesterday, when I took mt wife shopping just before the predicted storm that this morning has us snowed in for a while.

I've heard all of your childish boastings I want tongam. Unde stand that if there are any more of them I'll just turn the tape off and listen to the radio. I don't know if you think this is some kind of sick joke, if you are trying to psyche yourself up or if you really believe that nonsense, but whatever explains it I have time for no more of it. It does represent a state of mind that has meant so much trouble for all of you. As I told you long ago, being a good watchman is a fine thing, a respectable thing. But all those loud noises you make about either how tough you are and how the FBI is afraid of you and about international affairs you do not begin to understand are ridiculous. The same is true of your unending compulsion to defend that walking profanity you call "the holy man," Lane. Understand me, no more of this silly business or I don't listen.

On the Patterson records - ask him for them. Under the law the FBI was right not to give them to you because it would have violated his rights. He gave me a waiver, I got the records and I gave him them to him. This is exactly what I offered to do for you several years ago but you listened to the Lane/Jimmy foolishness that I am an FBI pimp of some kind. If I'd gotten the records on you I'd not ononly have done the same, given you copies, I'd have explained what they mean and seen what was being withheld and gone back for them. You, Jimmy and Lane all together will not know where the records they have not provided are because it is beyond you and Jimmy and all Mark does is talk, so bright as he is he'll know nothing about where what is that is withheld. By now you should have some understanding of what Jim and I can get and can do with what we get from the recent John stories that your small mind immediately concluded was Mark's work. If he was less that one percent of his mouth, with all the money he has made he'd have done that years ago. If he really gave a damn, as he doesn't except for himself.

If you didn't find any reference to me in the bank robbery records they are holding out on you in ways I know because I am in them, about two of them. Unfortunately you and Jimmy won't know what to do with this information and if by any chance Mark does he doesn't care enough to make the effort. But it is true, as I indicated to you long ago when I asked you some questions about it.

Because of the snow this won't go out for several days. The only reason it took me so long to answer is because as I've told you for the last time I am not going to waste time for your childishness about Reagan or other olitical or international affirs affairs you do not begin to understand or your boyish imaginings about what and who you are or how mean you are, which mean nothing and with which you run yourself down. If you have a compulsion to mouth such sick stuff, go to the bathroom, close the door and open the toilet and let it go. But I mean it when I tell you no more to me.

Sincerely,

PS The clippings are enclosed.
They got Jimmy's name in the papers where it can't do him any good but what else did they do? Make a record about which he can be cross-examined and made to look bad as happened in Memphis and Washington? He doesn't learn, either. HE is repeating the same mistakes that have him where he is and you are a thin carbon copy.
