Reenactment Film

During the investigation of the assassination in Dallas, Special Agent John Joe Howlett arranged for securing certain reenactment films. A print of this reenactment film is in use in Headquarters as instructive material in the various Secret Service schools. The print in our possession has a number of repetitive sequences and in a discussion with Inspector Kelley, SA Howlett was to edit this film and, if possible, narrate a running commentary on the film.

Please advise me of the status of this project and whether we can secure, at this time, any indication of a possible completion date.
