Dear Peggy,

Just got home. Away three hours if I got any calls. It was Gary Mack's information this morning that Waybright was to be fired this morning. He kept his source confidential. I am inclined to believe it was the FBI, if not Rookstool, Revell, his SAC.

Thanks for the copies of the statutes. Maryland fits! Important because the firing of Waybright does not resolve our problems. More if I have time later, but please send me what was not in the envelope, the last letter to Mary. The post office has already referred this to the postal inspector. I want it for them and for me to have all I can when I see the local former chief of police. Don't want to be pestering him.

While I could write Zaid, I think you and Mary should know and you've been dealing with him on the legal research. I think we need research not on representing himself as a policeman but pretending to have a formal relationship with and to be acting for any police department. If there is such a law we have Harry solidly. I expect more on this.

Only last night he added a different relationship that the Balt. police "sanctioned" what he is doing.

If I can I'll include more later. If not I'll write further when I can.

Thanks and best,

Harold
