Dear Peggy, Robbins 4/4/93

Our bearded Harrydan has been in the back of my mind most of the day although by about 3:30 I had completed a rough draft of about 5,000 words on a different subject.

It tired me some.

Parenthetically, I look forward to getting the copy of Harry's letter to Mary anointing me his new ringleader of his imagined conspiracy against him. I look forward to sending that all by itself in an envelope to my friend.

I think more and more as I suggested yeesterday, that in thinking of your artcile you should keep a book in the inner recesses because Harry himself has scripted a delightful farce for you.

I'm going to try to get a few clear prints of a few frames of the Zapruder film, the obvious cause of his recent conclusion that it was toyed with. He has to be referring to some the Commission did not print but I forced into the public accesibility because while his HT 2 is based on his notion (if it is based on anything, it is that disorganized) that the back of JFK's head was blown out it is clearly visible not at all blown out and there is no blood visible on it or even on the shirt collar. There is more to this than I tell you now but it forced him to admit to me, voluntarily, that he was wrong. Or That HT2 is wrong. He hates that!

So also with the toying with the autopsy film on which he first book depends so much. The disproof of that I published in 1975. He response is that what I wrote is incomprehensible. So I can provide that and it is quite simple, unequivocal and correct from the accompanying facsimile reproduction of the official record on which I based what I wrote. OR, HT I is also wrong.

His spurious invention that the Bronson film also was doctored Gary Mardck can and I am sure will explain. It is over that that Gary became one of this conspirators, that and Gary's urging Segales not to let Harry see the film because of his record of misquoting Gary. It was impossible given their known history, for any frame of the original of either film to have been altered. The existing copies would prove the alteration.

These are just a few things that would both flesh a book out and make it include all his crazy books.

Best
Harold
