Mrs. Peggy Adler Robohm
45 Lawson Drive
Madison, CT 06443

5/23/93

Dear Peggy,

Because I have heard nothing from the states attorney's office I presume they are considering the complaint I made and that it gives them some problems despite which they have not rejected it. ~~xxxxxx~~Yet?

I've been using odds and ends of time to fashion some sort of replacement of the analysis of Lifton's book that Waybright stole for him. I can't begin to take the time required for all that detail. I've written a sort of summary of it. In it I make a solid case that with the only thing new in the book his theory, which he presents as solid fact and established, he knew that at each and every step his concoction was impossible.

I do not know whether you have reach his crap that was so successful but he says that the JFK corpse was kidnapped, spirited to Walter Reed Hospital and altered there and then snuck into the Bethesda hospital by the back gate. He did not know, not having checked, that the back gate was locked and the guard removed so that no officer could pull rank and get it opened. The purpose was growd control.

He concocted his theory when he read in the Sibert-O'Neill report that there had been surgery in the head area.

Neither of those men having been called to testify there is no record of which I am aware of their explaining those words.

My own belief is that because they made only rudimentary notes and were about four days dictating them they by mistake presented in the form of a statement what they actually heard as a question, Humes asking those in the room and in the ampitheater if there had been surgery of the head area. They did use the word "area" and I believe that if any doctor had believed there had been surgery there he would not have referred to it as merely in the \"area." Inaddition, one of the corpsmen said what I think, second-hand to me.

I do not want to involve O'Neill or Sibert in anything in which they do not want to be involved, but if you would please when you speak to O'Neill ask him if my belief is correct, I'll appreciate it and will perfect the record by that much. If O'Neill remembers it as more or less as I put it, I'll appreciate it if he asks Sibert if he recalls it that way. Thanks.

When you speak to her, I hope Mary has found it possible to have the medical care she needs and that she and Buck are doing as wll as they can.

And I hope your situation is working out as well as it can.

Best,

Harold
