Dear Gus,

Recently a woman reporter asked me your phone number. I asked her if s information. She said it is unlisted. I gave her your address. I am not sur she may have been NPR, if you heard from her.

Thanks for the notes you sent. I'll read them with interest when my mi and not focused elsewhere.

I am sorry you did not send me what you said you would, Stone's shooti For one thing, I'm curious to know what changes he made after getting and after Gardner's story, for which as you I think know I am responsible, lished.

I can't learn this or anything else about the movie by going to it. I four invitations, one from the press.

The medical injunction is not to have my feet pendant for more than 20 ditto for sitting with them elevated. Infrequently I violate this knowingly when I get wrapped up in something at my desk, but it is always bad for me. to Hopkins I can barely get out of the car, and that when I sit with my nor ged leg horpantal. Until I get into the hospital walking is awkward, diff times painful and dangerous. So I'm not about to sit through three hours p regard as a disinformation, a dishonesty and the glorification of a man who harm, not even convinced before I saw the reviews that Stone is a master.

So, I'd appreciate it if you send me the script as soon as you can. P know the cost of xeroxing.

You did not spell out your relationship, if any, but if you are intere I wrote him, if that is not what I sent you, you are welcome to copies.

I hope that by the time you get this you've had a good Xmas and that t is better for us all than we now have any right to expect.

Best,
