Dean Fellow Researcher,

I am asking your help in a project that I would like to assemble. I would like your thoughts as to the effects of the assassination of John F. Kennedy, on both yourself and the nation. These statements should be rather short in length and could be from something you have already written and published. I have been studying the assassination now over three decades and would like to compile your statements. Eventually I hope to offer a collection of these profound statements in a book.

Dear Steve Moring,

"y thinking about the JFK assassination and what it has meant to me and to the nation has changed over the years.

Then I began what it meant for me was not in my mind. But the more time I ap nt on it the more I realized that it have me the chance to meet the obligat ions with which we are all born, as frost said, with promises to keep in the miles we go before we sleep. That meant more to me because I am the first of my family ever born into freedom. That freedom became mine by the accident of birth here.

The assessination of Presidente Kennedy was in fact as it was de facto a coup d'etat. It resultéd in an increasingly authoritarian government that increasingly subverts the spirit as well as the inent of these who to me for the world's greatesté political thinkers, our Founding Fathers.

I hope this is adequate for your purposes,

Best wishes,

carold Weisberg
