Dear Mr Weisberg,

My roommate and I wish to thank you for reassuring us that in the incredible mass of dishonesty which is filtered through the newspapers and public communications media, there are still a few people unafraid and unapathetic enough to find and put forth she truth as they see it.

we wish to congratulate you on your conduct and self control on the alan Burke show. Incidentally who employed those lawyers who seemed to be working together quite frantically to felibuster you, and yet who had not enough interest in the subject

to have even read your book?

Our local vookstore is sold out of your book and we intend to vigorously recommend and/or buy copies for as many of our friends as possible and spread at least a ripple of truth in ever widening circles.

we found - and depending on your preconceived ideas on the subject you may or may not resent this -

2

we found a great similarity in the government's handling of this case to what Trank Edwards, the NICAD organization and John g. Juller have encountered in their handling of UFO reports from police, air Jarce personnel, radar technicians and other evidence given by highly reliable witnesses. (you might find their books enteresting from this angle alone) We are equally distressed over this situation - and indeed, the total emplications of the whole dishonesty conspiracy and disregard for "the public" on the part of the government. Our best wishes and sincere admiration... There most be a public conquessional hearing on this Lennedy business -

Would it be going too far to say that either the government

seems to be covering up an international setuation which would cause a clamour in the public par a wared war of the facts of the assassination were known, or some plot among themselves? as you say, I suppose you cannot really discuss such speculations responsibly, Very truly yours, Rachel Steinhards and Joan A. Gotte

WNEW-TV WA6-2054 20734 August 1, 1986 Dear Misses Steinhardt and Gotti. Your encouraging letter meens much to us, and we do thank you for it. Then we get such letters - and we've had a deluge from the alan Burke show - it makes the difficulties of the past have more meaning. It is kind of you young women to take the time to write, and may am I say that as long as citizens, especially the younger ones who will soon enough have their own responsibilities to beer, are willing to participate is, express their opinions and not shun criticisms, then to that degree at least the democratic society is functioning. I'd like to have time to enswer your thoughtful letter as it deserves, but I just haven't. In heate, I do not know who the lawyers represented or who got them there or on whose behete they thought there might be a profit in destroying me/my book. I dare say that shoever they acted for regret the entire thing. I do not; I think it was wonderful, and it served to let those people who saw the show that it is the critics of the phoney inquest who are responsible and factual, not their opronents, and that criticism is what the viability of our society requires, not suppression and obfuscation. That you local bookstore is sold out makes us both hoppy and sorry. All the bookstores, of course, can get WHITEWASH from us. But they can also get it from their

regular wholesalars. The two largest in NYC ordered an additional 1500 last week! Thanks for your efforts in telling you friends about the book. This is important to us and to the cause of troth and justice and national honor, at least as we see it.

I am, as a mether of fact, interested in the Edwards book and its subject and I got two copies, one for a friend. I've just been too busy to read my copy.

You conclusion in the form of a question parallels my chapter "The False Coweld" to a alree degree. I found it was possible to present some of the evidence without conjecture, without irresponsibility, and I expect in the future to do more with it.

Again, our sinearely appreciation for you kind expression and your taking the time to express them.

Very truly yours,

Harold Weisberg
