Dear David,

In today's mail I got some pages from the ~~June-~~^July issue of something that calls itself The Investigator. It has an interview with Livingstone.

He is quite specific in stating that two Baltimore policemen on "vacation" went to Dallas to investigate for him.

There is no direct connection in the interview between that and what he says that is in the coming book, of which I've had two independent hearsy reports. They make it consistent with the records you have seen.

I think it is a fair interpretation that what was too bad for the publisher- and two who have seen the book to be published are shocked that such stuff can be published - Harry is going to publish himself, in Baltimore.

He calls that his fourth book and refers to a fifth.

I do not send you a copy not to involve you if you do not want to be involved but if you or your people want it, let me know and I'll send it.

If as I think I do I know Harry and the intensity and determination with which he is pursuing his insanity it is going to blow up at some point and it will then be too late for anything that might be self-protection.

If not before that fourth book, which from what he says is close to ready to be printed, then it will be with Killing the Truth. For that you can be certain there will be extensive advertising and promotion. The promotions will have Harry touring and speaking and being on talk and other shows. To recover the costs of an initial 50,000+ hardback print, major efforts are required. The fourth seems to me to be certain to cause an explosion in Baltimore.

^{For that} Harry need not brag any more about the Baltimore policemen working for him and as investigators for that ~~he~~ to be an attention-getter. *But he Harry I know will brag on that.*

Harry has said that Richard was to his knowledge working for Lifton. I am expecting that soon. I've been told about it and promised a copy.

I have been and I intend to continue to be publicly silent and I've been too busy with other things to have said more than virtually nothing in private. But I fear the time is not far off when I'll have no real choice but not to continue silent.

I see Lil has another batch for the boys so I'll send that, too.

Our best to you all,

Harold

By the way, the normal spread from the beginning of manufacture to public sales is usually about three months with hardback books. Livingstone's Carroll & Graf book is to be out before the anniversary. That can indicate that manufacture is close if not begun.
