12/11/69

Dear Gary,

The owman on this phone call has been and may be mentally ill. It has been some time since I heard from her. She phoned me tonight. Now all of this may be gibberish. I have no way of knowing, But when she returned to the "Burovik method", I decided to tape it and send it to you. If it is not on the tape, she says she recalls the fri nd to whom she loaned the magazine, which she says she believes is Science and Electronics (why she should see such a magazine I cannot guess).

If there is such a thing as the Burovik method and there is this article about it, and she sends it, I'll send it to you unless you know of it.

After you hear this, if you have any further interest, I'll tell you about her. Saying anything more now might be prejudicial, either way.

Sincerely,

M

Note-it was Lillian Drury
