11/30/69

Dear Gary,

Some time ago I asked you if one of your group could go over the autopsy report, list every fact, every number, and see if he can find the raw material in CE397. This is in preparation for suit. You haven't answered, I presume, because you are so busy. However, I'd like to know if it is possible, not that it will be done by a certain time. We are, I hope, getting close. If I see Bud tomorrow, as I plan, I'll have a better idea of what he agrees to go for and then I'll have to prepare my own list and see if I think there is anything he has omitted. If so, then we'll have to get together on that. I've sent Paul my only copy of the correppondence on the King/Ray letter, for him to copy and send you a copy then return.

Except for what I've sent you, nothing else really new. I'm tired from a (for me) vigorous day outside chopping and sawing wood and carrying it up to house, so I think I'll xxxx sp nd the rest of the before-bed night in the futility of the Penkovsky Papers.

No hurry, but I've not gotten Crafard II.

Of the letters of which I've sent you copies and nothing since, no responses.

Best,
