10/13/69

Dear Gary,

There are a few things I didn't have time to go into in responding to your letter from Dallas. I wanted to get it in the outgoing mail.

Mary was not coy with me. She told me quite explicitly how she puts on the big-eyes, little ol' housewife routine. She and Arch also promised me things they've never sent, never referred to since. There was no explicit answer on the transcriptions of the logs, of which she'd told me. However, they were to remove from their deM file what must be kept confidential and send me the rest. I told them I am in a position to use it to elicit further information. The opportunity will now, at least for the moment, pass.

On the other hand, they've asked nothing of me.

If they have consciously sought evidences of right-wing conspiracies, I am much encouraged. But I doubt Sue could, if she would. She thinks Panabaz is a great buy. Even though Paul has your P file.

You are familiar with the areas of my interest. If they have, to your knowledge, anything pertinent or files that encourage the asking, please let me know. I outlined it, briefly, to Mary, and it hasn't changed. Unless they have personal things about the hospital/medical people, the greatest likelihood is for AGENT OSWALD. I would expect they have gone farther than any of us with False Os stuff. If Mary can let us know what they have on KT that we do not, that also could be helpful. Did they go further with the Odio bit? Here again they could have, for the sources are all of their persuasion.

I'm tired and my mind isn't functioning well. Can't remember the other things.

When you said Lifton "sold" her copies, do you mean at more than the cost of duplicating? Even for him that would be bad.

If I haven't asked you if you can get a medical student to do a simple job for me, can you? I'd want every statistic, every figure or fact that could not be kept in the mind, in the autopsy, recorded in a list and then compared with the descriptive sheet, to catch what, if anything, is not there or on the supplemental proctocol. The purpose is to see if it is possible this proctocol could have been written with no raw material other than Boswell's notes.

As I believe I told you long ago, just getting an understanding of what Mary has may be worth the entire trip. I am anxious to hear more of this and what else you are learning, when you have time.

Best,
