Gary,

Before I have a chance to forget: whether or not I told you, I did ask Sylvia to intercede with Tink so you could have access to his pictures. Her reply, received today, is that he is in Denmark for a year.

With your approval, I will in the future ask her, if she hears from him, to ask him to have them made available to you.

If she will do this, he will expose himself if he refuses. If no other consideration weighs with him, this might.

Frankly, aside from the certainty Lifton will share nothing of significance, which I hold, I am not much less certain he is incapable of cleansing his mind enough to see what can be seen. He wants his preconceptions met, and if the evidence doesn't do that, he doesn't see it.

Note from Paul R returning hat I'd sent him, with apologies for not writing. From the oil-lease alone, he had to have been busy. But I note no bragging about how many cats he shot in Mexico.

Hurriedly.

HW
