Dear Gary.

It has just occurred to me that I haven't told you I've gotten nothing from Fred/Killian. I do not suggest you say or do anything about it. I merely believe you should know. It is my recollection you told me that what they had developed on the second car, etc., they were sending.

If this is the case, I really think you should not chide them. Let it cool. There is so much to do, not having one thing or another when there is no urgency is no serious loss.

At this moment, the book is too long and will be longer, so there is little I'll really want to add on Sirhan over what we have already discussed.

The Ray material is much too good to sacrifice. At least, that is my opinion not having read it. It also has better potential.

If they did say they would do this and do not, you are one up in your relations with them if another hassle arises. I hope it doesn't.

Your silence on this score makes me hope the entire thing is past.

But, I am not content not really knowing where the leak im. And, I suppose I am troublednot really knowing what Lifton is or isn't, aside from being sick.

Hel has not sent the promised Fred interview with Kolby. I have reminded him of this. Again, it is not important.

I dropped Matt a note the other day. I think I forgot to make a copy for you. he may be off on his boat for the summer. There is something he could do for me down there if he would and would be totally silent about if. If he will not or cansot be, it is, potentially, too hezardous to ask it of him.

Nothing really new. Feel okay.

Reagrds,
