Dear Paul and ary,

I'm home, too busy to write, with about 18,500 words of my snelysis of the new material written. It is more spectacular than I've told you, as I learn as I got. Wecht agrees. Unless lince opposes it, which I do not anticipate, we'll soon be back in court with it. Wecht is associating himself with us. I've sent him copies and he has read enough to see what is there.

Bud and Vingo are coming here tomorrow. I have to mail something to N.O. so I write this brief note. I've gotten P's letternto Moo and Gary's Fred enclosures.

There really is nothing left of the WR save the problem of getting attention to what I now have. There was metal in the brack "region" and both sets of doctors knew it. The fatal head would hit in the top and the autorsy doctors lied by 300%. Need more. I have it too, and you'll get it when this draft is typed. You are also getting mimoegraphed capies of all the papers. Bud has done that. I have Xeroxes for you, but he now thinks we may need them in court.

The second instalment of Gary's papers, quite a bundle, have just arrived.

Hurriedly.
