

July 25, 1971

Dear Paul,

Thanks for your letter of July 13 and its enclosure. Enclosed is a copy of my most recent letter to Harold.

I don't know whether the Lifton "gem" is something Liebeler himself recognized as meaningful, but only that it seems to have come from a great mass of materials Liebeler decided to keep for himself. From what I know Liebeler himself does not know much, and has not made real use of his Junior archives.

I will mention your idea to Ned. As you will note in my letter to Harold, I haven't seen him for a while. He missed a big picnic given by our household last weekend.

Glad to hear that you finally met the computer operator who gave me a lift in SF. That still seems to be an amazing coincidence.

I make note of Bradley in my letter to Harold. He still seems, as he did when I first spoke to him on the phone, to be a laughable candidate for the "top CIA executioner in the world." I have heard that Fred Lee Crisman is a poor sho-in for the "top CIA paymaster of assassins in the world."

Well, back to the grindstone. I still have to type up my visits to Calif. drug agencies. Hope this letter finds you and your girl in good health and spirits. To quote a well-known American scholar: "physics sucks." Keep that in mind and you'll never go wrong.

Best.

*Gay*

Ps: What is Don Olson up to. I haven't heard from him in a year or so. Is he still interested in the case--is grad school taking up all his time.
