Dea r Gary,

Thanks for your note of the 18th.

I look forward to hearing further.

Currently the pressures are greater because of apprehension over how I feel, whether it is part of a normal post-phlebitic syndrome; and the unconscionable conduct of the self-seekers and nuts with the House and the bad vibes for that investigation.

Lane and his usual gang of crooks and psychopaths have been businly engaged in stealing my ing work in a deal that involves NBC and a special for it by the liberal Abby Mann.

These are sick people but I can't heal them.

However, in more than one interest, it is a good I idea that I keep up on what they do and say and plan. So, if you come accross anything, clips, tapes of broadcasts, etc., I'd appreciate copies.

Lane is now THE expert on the King assassination, his fastest ripoff. He actually knows nothing but by using the NBC/Mann connection he has begun by comming the Black Caucus, none of whom would really turn on when it happened.

He is being booked on it by the outfit he kept from booking me on it years ago, the American Program Bureau. My letter to the Boston address I had was returned. This means they have been away more than a year.

These rascals always play into federal hands and always cause disinvestigations. This concerns me as much as or more than the damage to me personally from it.

Thanks and best,
