Dear Mr. Weisberg,

Livingstone's *Killing Kennedy* was a new release at my library here in Janesville. Though I knew that it was written in 96 I believe.

I am reading your "Oswald In New Orleans", I really like it. I have some problems, I do not understand what you are saying in chapters 2 through 6. I read them more than once and I do not get what you are saying. In chapter 5 I thought was interesting was the tape of the Bob Scott interview with Andrews. Do you still have that? Do you have it in written transcript <sup>form</sup> ~~from~~? Or is it just on tape? Could I see it next time I visit? What did Garrison say about the tape? Did he use it during the Shaw trial?

In chapter 4 what does no T-1 mean, was that an agent for the C.I.A? through those chapters I don't get what they mean. Then in Chapter 3 who was McLaney? What did he have to do with anything?

I do think that this book is helpful, I have learned alot from it. Another question, Did the FBI really investigate Ferrie? Can you recall what they asked him? Why didn't the Commission interview him?

In Oliver Stones book of his movie JFK, the book says that Jack Ruby's house was down the street from Oswald's rooming house in Oak Cliff, is that true? I don't recall ever hearing that before, probably just a lie.

So if you could answer the questions I asked that would be helpful, thanks Harold. Take Care and say hi to your wife for me.

Your Friend,

P.S. I understand the rest  
of the book, I don't understand what I asked  
you about.
