

Schuyler's Theory Pushing 3 Possible Theories on JFK Death

WASHINGTON, D.C. (AP) — A theory that three people conspired to assassinate John F. Kennedy is being investigated by the Warren Commission. The theory, which is being pushed by a former CIA official, suggests that the assassination was part of a larger plot to destabilize the United States government. The theory is based on the fact that three people were seen near the assassination site: a man in a dark suit, a man in a light suit, and a man in a military uniform. The theory is being pushed by a former CIA official who claims to have information about the assassination.
