Dear Dick,

Thanks for the explanation in your letter of the 15th.

There apparently was a problem of my earlier letter reaching you because I wrote twice, once as soon as I heard you had obtained the FBI's dirt collection on the Warren Commission critics and at least once thereafter. Your printed volumes include the cover letter to Marvin Watson, with all names removed. I also asked for a copy of that with my name only remaining to use to try to pressure the FBI into compliance with a request about two years old and still not complied with.

It is pretty vicious stuff - even after all the disclosures. Where they were not factually incorrect they twisted and distorted and exaggerated to achieve an intended and I regret I believe accomplished end.

There is some they will never give me because by now they know I can prove what they did. On what is in the paper this morning I did, months ago.

To give you a better idea of what you were coping with I tell you the story. I learned from the racists J.B. Stoner that he had learned that those he says attempted to interest him in racial violence were FBI informers/provocateurs. When there was other information I had that I thought the Criminal Division could use - interviews to which there were no restrictions from those planning a Haitian invasion - an after a federal indictment I offered my records. In the course of this I passed along what I said I was sure would come up at one point or another, these accusations against their finks, which really meant them. They twisted that in their secret internal records except for the kind of distribution that led to so write you, into me conspiring with Stoner. He a Jew and he believing "the only think wrong with niggers is Jews." Fortunately I had records, including what DJ had written me. And I've given them to the since-silent FBI. But that does not undo the great harm of their distributions of some of which I have copies. While I have no knowledge of Stoner's innocence or guilt I think he can make effective use of this in court, perhaps being acquitted if guilty. The FBI was not interested, in Washington, in what its minions were doing in the south.

There is much more of this unspeakable nature.

Until last Tuesday I did not know you are on the subcommittee looking into the CIA toying with minds. I could have been of some help. I've been onto that from Warren Commission records I had years ago. I followed the Olson case closely and had records on it because it is local and because I knew one of his sons when he was in high school. Between these two I tried to keep close. The CIA is now stonewalling me on their recent releases. I did develop a source with some first-person knowledge of the past and hence a continuing interest. He might have been of some help in your hearings.

I never did obtain all the intelligence committee published records and it is beyond my present capabilities to go to the GPO for them. I'd appreciate it if you could let me have whatever your subcommittee publishes on this and anything else on the subject it would not be improper to let out. I do not want this for my writing. My problem there is finding time to use what I have. I want it for the completeness of the archives I have already begun to deposit in Wisconsin. The morning you saw me I learned of serious and acute thrombophlebitis. Recently of ather, arterial problems. So leaving as full a record as possible for the future now means more to me. Thanks then for anything you can have sent.

Best wishes,
Harold Weisberg

Mr. Harold Weisberg
Route 12
Frederick, Maryland 21701

Dear Harold:

Thank you for your letter of September 7. It was good to hear from you again.

Unfortunately, I do not recall coming across any of the information referred to in your earlier letter during the original Senate Select Intelligence Committee investigation. I am very sorry that I am unable to be of assistance in this case.

Best wishes.

Sincerely,

Richard S. Schweiker
United States Senator
