assilable files on these copyrights examine pages with handwriting. I presume all the inactual applications are. I think it best that we actual applications are. I think it best that we it is the handwriting I am interested in or why. In there is any problem, and innot anticipate one, a Mr. Mark Lillis, chief of the book division, has been very happened to me and would probably assist anyone who phoned him and asked for his help on my behalf. Thile I also expect nothing of exceptional interest in the files, I would be interested in anything of this sort that might be there and would want such information Xeroxed also. When you get it, I will pick it up. Many thanks.
