"THE GREATEST LEARNING METHOD DEVISED BY MAN"

. . . says Dr. Georgi Lozanov of the Institute of Suggestopedia and Parapsychology. In his book "Psycho-Cybernetics" Dr. Maxwell Maltz, M.D., stated "you are never more or less than the input to your mind". March, 1971, N.B.C.'s "Today Show" starring Hugh Downs featured a noted scientist from one of the nation's leading Veterans Hospitals discussing Brain Wave research and some of the potential capabilities of man once he learns to control his own brain waves. Hugh Downs, with millions of viewers watching, demonstrated his ability to control his own brain wave, while attached to brain-wave feed-back equipment.

This rapidly evolving science deals with the conscious control of the electro-chemical activity of the human brain. There are four principal brainwaves: the Beta wave, associated with the outer conscious levels of mental activity, anxiety, tension, etc. The Alpha wave, associated with inner-levels of mental activity, tranquility, inspiration, creativity, concentration, E.S.P., accelerated learning process, memory, learning, and many mental changes. The Theta wave, related to deeper levels of meditations, concentration, and potentially even greater learning and recall capabilities. And finally, the Delta wave, associated with deep sleep or total unconsciousness.

It has been demonstrated that the Alpha wave produces a relaxed, tranquil state of mental alertness, and trained individuals can "turn-on" Alpha at will, effectively eliminating unnecessary work and anxiety without the use of drugs. Also, they could enhance awareness, concentration and recall.

PRACTICAL APPLICATIONS

Researchers have developed a practical application of this exciting new discovery, whereby an individual, in a few short hours through the use of alpha-cybernation mental exercises can turn the alpha-wave on and off at will, and through practice of this exciting new technique can develop a superior way of life, without the use of bio-feed-back equipment.

Increased awareness and greater mental capacity was realized by top management executives across the U. S. indicated by studies recently released by the American Association for the Advancement of Science, through use of their powers of intuition and E.S.P. for corporate decision making enhancement and influencing others, and were able to successfully improve corporate profits by substantial margins.

E.S.P. RESEARCH

As research continues, however, another great more dramatic by-product has come to the front. E.S.P. could be learned. Those undergoing training were found to be extremely sensitive to the feelings and emotional attitudes of others. Intuition was enhanced and techniques for sensing information at a distance were developed. It was found that many businessmen, engineers, sales executives, housewives, nurses, and students could use telepathy to obtain information for problem solving, to alleviate them to control and direct their careers and lives to new heights. These techniques have been incorporated and refined into the most exciting training program ever offered to the public—the program is called . . . ALPHA CYBERNETICS.
