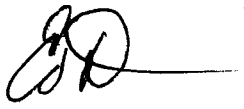
Hal---

If I were you, I'd get an affidavit from the man whose attache case was "stolen." I have a feeling there will be a worthwhile use for it, as well as the other information about the assassmatopm seminars.

Have no ex-Army snoop contacts but even if I did I would have to know more about time period involved, in what connections possible surveillance, etc.

What or who is RKO, employer of man with slippery attache case?

For all the turmoil Skolnick creates, especially his morbid interest in conspiracies, not to mention his own generation of conspiracies, could he, just possibly, fit the profile of CIA agent provocateur? Think about it.


Best,
