

11/25/75

Dear Ed,

My own view, as I think you know, is that the time for thorough exposure of the monster Skolnick is long since past. I am now in possession of evidence that has never to my knowledge been indicated before and I write to see if you know anyone out there who has the balls, the interest and a few figures.

I was done, Sharlie.

Yesterday and the day before his gang became storm-troopers. And they have crossed the line into the obscene in a way that should offend almost everyone. Hearing those who had or have an affectionate regard for the memory of JFK, supporters of Richard Nixon, and Jews and others who resent storm-trooper tactics and anti-Semitic caricatures - in this case of Nixon.

These - and I have them - I personally received from his right-hooked driver - bodyguard whose name I believe is Dave Hoffman, in the presence of a liberal lawyer in and from Washington and I believe of Andy St. George and Bob Brown, both ultra-conservatives. The occasion was the few seconds after they turned over the registration table on Bud Fensterwald's young woman registrars at his assassination seminars at Catholic University (CIA to Skolnick personally and I'm sure on tape). Skolnick was determined to take it over and his threats succeeded to the point where Bud had to give them the end of it as the only alternative to more violence.

They did steal, and of this, if necessary, affidavits can be had. They stole the attache case of a young man I know, who happens to work for RKO, and they told the people running this convention where to find this attache case. They appear to have been interested in its contents, but the prized property was not in it but was in a pocket. It was a good print of the Zapruder film.

Larry Anley, CDN, was here for part of this. What he observed I do not know. He left before the end. He does know Sherman and his gang were present. I do not expect him to do a Skolnick story but have no independent knowledge.

By now my Skolnick file bulges with documents, all proving what has just been alleged, that he is a crook and a faker who for whatever reason, and I believe it is some kind of self-concept and self-promotion, is capable of anything.

I understand that while I was being interviewed by a representative of the alternative press outside the auditorium he was calling me, too, a CIA agent. Love over, Renzie Davis, apprentice guru!

I imagine the inspiration for this is what I said in response to a question addressed to me as a member of a panel on the media. It was about his insane and irresponsible mouthings on the Dorothy Hunt crash. I asked the questioner if it could be that his real objection was to the accuracy of what was reported rather than to the media. This dealt with Ron Keeler's WixPost stories proving Skolnick's claims were a farce. On this, by the way, I have documents the nature of which discredit the belief that what Skolnick really did is mask the suppression of real evidence indicative of the suppression of evidence. It seems that all she had with her did not go through the coroner's hands! And instead of sending those \$100 bills to Hunt and with them what could be evidence, they were deposited in a Chicago bank and he was sent a check. I have front and back xeroxes plus proof of the foregoing.

But I don't know who, if anyone, out there is interested in buying a story that would tell it about Sherman as it really is. With or without fascicles.

Your 11/21 came but I've not had a chance to open it. Thanks,
