Dear David,

Herewith two disks that are the best I can do on Hoax as written. The publisher was to have retyped all of it and didn't and as you know I have no computer and as copies were made this is what was returned, what remained. You are welcome to use all I used of Posner but if there is anything else about which there could be a question, please check with me. I've not gone over any of this and it was rushed as you might find it hard to believe.

There is no charge, of course. But I am not now able to do any searching. I spent most of yesterday at the local hospital where there was an as yet unsuccessful effort to discover why I'm so weak, so utterly fatigued and weary. Besides which, as you know, the use of stairs is a problem I avoid.

I do not recall ever making any kind of real study of the efforts made against us by the government. There might be something along this line in my multitudinous appeals most of which DJ ignored. Of those you call the anti-critics I've had no real interest in some and with regard to Schiller, Specter and Belin my files are large. If I did not say it in the interview, despite the severity of my criticisms of them and others on the WC I have not in all these years had a call or a letter from any one of them complaining that what I wrote of him is unfair or inaccurate.

Reuur Graf 3 I think the way NEVER AGAIN! begins is best. You are welcome to do that searching and copying but now it is beyond me.

Thanks for the info on the Archives. What should be there and I believe is not is the books Frazier annotated at Hoover's request and the memo(s) he wrote about them.

As you know, you are welcome to copy just about anything I have.

Best,

Harold
