Dear Forum,

First, my appreciate of and thanks for your effort.

I would like to know more about it of your problems with it.

As you can see from my typing, I cannot use any computer. So I cannot fax this to you.

I am 83 years old, in impaired health but am still writing about out political assassinations. I alone write about <sup>h</sup>tem based on the official evidence and without any conjecture of theories. The writing is not commercially acceptable.

After 10 books of this nature I have written one that addresses motive, means and opportunity. <sup>h</sup>It does not claim to be a solution and its states repeatedly that it is not and is not to be taken as anything like that. But it does address motive, means and opportunity, again with what is public. That unpublished book is titled <sup>h</sup>aketh the Watchman.

I would like to use your statement and all else you can provide as an epilogue in that book. I am particularly interested that after the initial report in the Washington Post two days ago there has been no paper that carried any news account of which I know. Yet I think that aside from its considerable importance because of its content, its objective, it is without precedent by its nature.

I would like to have to quote the full text of the statement and any information you can give me on the refusal of the major newspapers to carry the statement as a news account. I would also like to know the cost of your ads and where they were published, along with, if any, any rejections. I have the ads as they appeared in the Washington Post and The New York Times.

And anything else you can think of.

Thanks for what you have done and for whatever you may send me.

Sincerely,

*Harold Weisberg*
