Re: William Boxley

From: Andrew Sciambara- Dec. 6, 1968

Boxley came to the office in March of 1967. He came into the city of New Orleans to live a cople of year ago. The Rose Cheramie investigation was what brought him in. The office was investigating the Rose Cheramie matter and apparently Miloci, the office investigator, came across Boxley in Texas.

He conned Garrison into thinking that his greatest asset to him would be to teach him the ways of intelligence agencies.

He was sent by Lou Ivon and Sciambara to work with Barbara Reed. He informed Jim that Barbara had to be an agent.

He said that she was coming up with stuff that had to come from the agency.

Lt. Fruge of the Texas State police introduced BEXER Boxley to the Garrison investigator who was down on the Rose Cheramie matter. Fruge has a fine reputation as a good man. Fruge advised that Boxley had been CIA, but began to drink heavily. At first they made Boxeey an instructor, after the drinking, then they got rid of him.

For a long time Boxley was incognito with the staff. He was very secretive. Ax He would not let the staff know what he was doing. He would report to Garrison from little copy books. There would be no signed memos frowing out of his work. We eventually learned that his named was William Wood or William Boxley.

ulliam Boxley (Continued)

Sciambara went on a trip with him. Two cars passed.

He, Boxee, hid his face and turned his head. He said

that they were being followed. Later he said that two men standing
on a corner were agents. Sciambara asked how he knew. He said
that he could tell from the way haey wore their hats.

He never got a phone at his apartment although Lou Ivon kept
asking him to. He argued that phones were unsafe. Finally
he got a phone, and only Grrison knew his number.

He refused to write and sign memos because he didn't want
to be held responsible with the agency.

When Fruge worked with him in Texas while he was with the CIA,
he would suddenly declare that someone was innocent and should
not be further investigated and lead Fruge into some other area
and onto some other persons. His argument in obtaining the job
was that he had Texas connections and that he knew the ways of

Lou Ivon has looked into this matter and has never been able to ascertain whether he did in fact work for any newspapers in Texas or anywhere.

the CIA. He claimed to have written for newspapers in Texas.

Boxley (Continued)

Boxley brought a colored investigator from Garrison's office up to the country on an investigation. He told him that the CIA would dause a person to be rendered unconscious, roll back the eyebools, inject a pin into the ye, and then perform a brain labatomy. The investigator ended up in two days in a state of high anxiety and near collapse. He could not sleep, but merely lay in bed with a gun gripped in his hand and held on his chest. Boxley convinced him that 20 people were a in the countryside waiting to lynch him.

When he and Bill Turner were living with Jim Garrison in California they Garrison

KMM/convinced THEMSE/to indict Bradley, Hall, Howard, Seymour Jack Lawrence

and/CEESMAN. Alcott refused to indict them. Finally Garrison settled for Bradley.

While they were working over Jim, a package was delivered at the motel. Boxley seized the package, brought it to the bathroom, filled the tub with water, and tossed the package into the bath tub. It turned but to contain Larry Schiller's book, "The XX Scavangers."

James Alcott received a call from a student in a Southwestern University who said that Poxley had interviewed him for a job with the CIA. This interview, the student said, occurred after Boxley was supposed to have quit.

Boxley (Continued)

. Last thing Boxley said before he went to Texas after dropping the : Perrin memorandum which was forced out of him by the demand of Garrison was that he must provide a memo before He left, was that the case had bee n solved. "Well, Jim, we have solved the case. We have hit them at the crux of where and how they work. They will kill someone else instead of the person who is supposed to be dead. Perrin was the assassin on the grassy knoll. They killed someone instead of Perrin. Perrin was still alike and was the grassy knoll gunman. Perrin was the guy who fired the fatal shot. That is also the explanation for the killing of Tippit. The reason Tippit was killed is that Nancy Perrin Rich called Tippit before she went to Texas. Tippit also knew Robert L. Perrin was the assassin who was on the knoll and therefore he had to be killed for that reason. The assassmination team used by the CIA was a very small team. They don't want to let too many people into the picutre, so that they used the assassination team again and again. They performed double and triple duty. Nancy Perrin Rich and Robert L. Perrin were in N.O. to arrange the assassmination of Kennedy in 1961 when he made appeach at the Nashville Street Wharf.?" The wharf was cased by Boxley who found it to be a perfect place for the assassination to have been performed. X) Boxley explained further that the reason wax why the assassination wasn't carried out then was that the assassins figured that they could not get the cooperation of the chief of police, Giarusso, so they had to wait for Dallas. The assassination team is

oxley (Comminued)

Itill in operation and now Bradley is in charge. Boxley explained that Bradly is the leading killer in the world for the CIA. Nancy Perrin Rich, he explained, was the girl in the RM polka dot dress who had been involved in the Kennedy killing. Galt met one of the conspirators in the King killing in Van Ives, Claifornia, in Bradley's home town at the Wallace Headquarters. Galt was in the Wallace headquarters to meet Bradley. The Wallace Headquarters was a blind. Bradley is the most imporrant CIA executioner in the World.
