Today's (1/11/92) Washington Post has a full page of letters relating to the Stone movie, "JFK." The longerst, and rather long for a letter, is mine. I wrote it originally to the assistant editor of the editorial and oped pages, Stephen Rosenfeld, following an afficle he wrote. I knew it was too long but I wanted to inform him. When they decided to use it earlier this week someone in that department spoke to George Lardner. He started to indicate that I should shorten it. I asked him instead to do that, saying it made no difference to me what was omitted. (Wgich I do not now recall!) So, I presume he cut it to the length wanted.

I do not recall that I referred to the neck fragments as of bone. Could have been metal.

This can be and I think will be an embarrassment to arlen Specter, who is already under attack in the Stone movie. He responded with articles in Penna. papers, one that I have rather long.

If Stone with all his somealled experts had had the slightest idea of the fact of the assassination they'd have used what I use in their attack on the søngle-bullet theory and on Specter, who fathered that bastard. (I wonder if Stone picks it up. I am sure that at the least Frank Mankiewicz will be aware of it and he is handlang Stone's Washington p.r..)

As Specter knows, his colleagues and Hill employees will be aware of what I say and there is no factual and relevant refutation Specter can make.

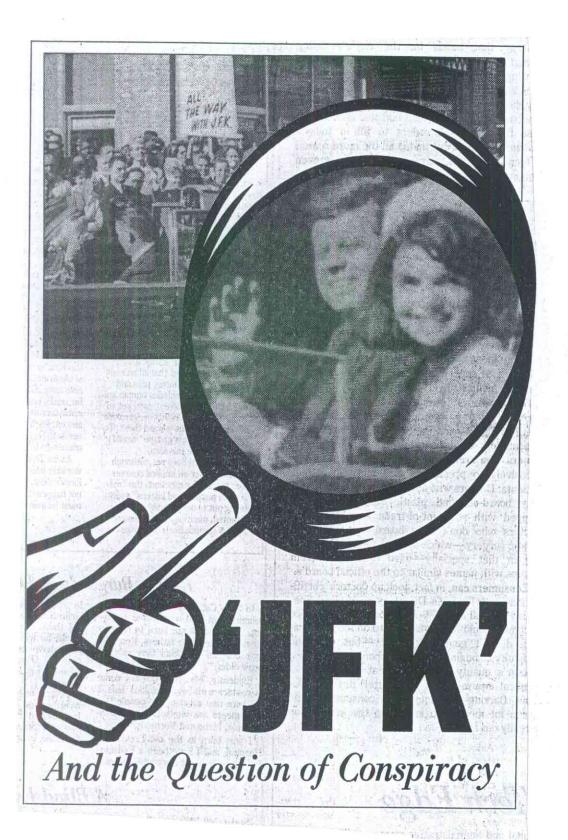

Then, too, the FBI and Secret Service will see this letter. Normal practise in the FBI would be to prepare a memo or memos on it, beginning with the divisions of knowledge of this area of the evidence or other interest in it.

I hope some reporter asks questions about it, of Specter, of the FBI, or those former Commission lawyers still in the washington area. Of these, only recently Howard Willens was on a local station defending the Warren Report and Commission.

Perhaps other former Commission staffers will be maked by reporters in their areas.

While there is no assurance that anything will come of this, it will be read by many people in the area, some reporters, some who know Commission former employees, some lawyers and more who known none of the Commission people.

It remains to be seen whether this time anything will come of a definitive expose of the Commission and its staff, particular Space Specter.

I'm the 'Odd Man Out'

In their op-ed article "Kennedy Assassination: How about the Truth?" [op-ed, Dec. 17], Gerald R. Ford and David W. Belin bemoan the fact that neither the five-part A&E series "The Men Who Killed Kennedy" nor Oliver Stone's "JFK" includes an appearance by any of the physicians who have examined President Kennedy's autopsy photographs and X-rays. These doctors support the findings of the Warren Commission, namely, that Oswald, a lone assassin, fired three shots, one of which produced seven wounds in Kennedy and Gov. John Connally and emerged in near-pristine condition with only 1.5 percent loss of its original weight after some incredible midair vertical and horizontal gyrations in the course of its momentous journey. The writers are extremely unhappy about the fact that the one physician who reviewed these autopsy materials and disagreed with the Warren Commission "appeared repeatedly on the A&E network in a number of the sequences." So painful is this fact to Ford and Belin that they can only bring themselves to refer to this person as the "odd man out."

The "odd man out" has a name and identity—the undersigned. I am a board-certified anatomic, clinical and forensic pathologist who has performed approximately 11,000 autopsies and reviewed more than 25,000 others. I am a past president of the American Academy of Forensic Sciences and the American College of Legal Medicine; member of six graduate school faculties; author of 300 published scientific articles; editor or co-editor of 300 published professional books; and a member of 20 national and international medicolegal and forensic scientific journals. I have lectured in more than 60 foreign countries (several times on the JFK assassination) and have been qualified as an expert in forensic pathology for trial testimony in approximately 30 states. While none of these credentials automatically makes my analysis of the Kennedy assassination correct, I would suggest they do qualify me to render a competent, professional opinion regarding this highly controversial murder.

In August 1972, when I examined all the JFK materials at the National Archives, I "discovered" that the president's brain, microscopic tissue slide and Kodachromes of the internal chest wounds were missing after having been specifically identified in an inventory dated April 26, 1965. More than one-half of the Warren Commission report physician-supporters, whom Ford and Belin would have readers believe are such credible, unbiased experts, were aware before my public disclosure in 1972 that these critical pieces of physical evidence had been illegally and surreptitiously removed from the National Archives (by an as yet unidentified person). Apparently, they never felt ethically or morally compelled to refer this important finding to the news media. Even today, almost 20 years later, the silence of all these physicians regarding the missing medical evidence is deafening.

I expect critiques by your paper on anyone who dares to challenge the validity of the Warren Commission report. I can only hope that in fairness you publish an occasional response from the individuals who are attacked. As for me, kindly have courage to refer to me by name the next time.

-Cyril H. Wecht

The writer is chairman of the department of pathology at Central Medical Center and Hospital in Pittsburgh.

Prying the Lid Off the 'Big Lie'

How sad and how predictable to see Gerald R. Ford and David W. Belin once again trying to shore up the deeply flawed findings of the Warren Commission [op-ed, Dec. 19], a charade in which they were such significant but naive players 28 years ago.

were such significant but naive players 28 years ago.

The fact is, critics of the official version of events have been largely ignored by the mainstream media in the United States and have had no adequate platform for their views until now. Yet it is only through the determined efforts of this small, disparate band of disbelievers that the quest for the truth has been kept alive.

My documentary film series "The Men Who Killed Kennedy"—the object of Ford's and Belin's vilification—was based on five years of effort, more than 300 face-to-face interviews and, unlike the Warren Commission, began with few preconceived notions. Its conclusion, that Lee Harvey Oswald was innocent and that

Its conclusion, that Lee Harvey Oswald was innocent and that the assassination of President John F. Kennedy was the result of a complex conspiracy followed by a coverup at the highest level, is based in many instances on information and testimony that the Warren Commission knew nothing about or, more significantly, chose to ignore in its rush to judgment.

It is the Warren Commission, not the filmmakers, that has been responsible for the perpetration of the "big lie" for more than a quarter of a century. As the lid on this dark affair is slowly pried open and the real contents examined by the American public, it is perhaps not surprising that the surviving members of the Warren Commission are showing distinct signs of discomfort and alarm.

—Nigel Turner
The writer produced and directed "The Men Who Killed Kennedy."

Credit LBJ

Gerald R. Ford and David W. Belin report that I participated in the A&E series "The Men Who Killed Kennedy" and was a consultant to Oliver Stone for his movie "IFK." They allege that I disseminated a "big lie" and "a fraudulent misrepresentation of the truth to the American people." Nothing could be further from the truth, and neither writer had the courtesy or guts to check their hatchet job with me beforehand.

Let's look at the record. They credit me with this quotation:
"You see, you're dealing with a very high echelon of power
... otherwise, how could you have gotten people like the chief
justice of the Supreme Court to participate in the coverup?"

In his own book, "The Vantage Point" (1971), former president Lyndon B, Johnson wrote:

"The idea of a national commission was first mentioned to me by Eugene Rostow of Yale Law School . . . Dean Rusk and columnist Joseph Alsop. . . "

He went on to say:

"I knew it was not a good precedent to involve the Supreme Court in such an investigation. Chief Justice Warren knew this too and was vigorously opposed to it. . . . He opposed serving on constitutional grounds. He said that if asked, he would refuse."

Then Johnson said:

"There was no doubt in my mind that the Chief Justice had to, be convinced."

Those words of Lyndon Johnson's, along with my knowledge of his well-known powers of persuasion, are among the things I had in mind when I made the above statement.

In the Atlantic Monthly of July 1973 Leo Janos, an old friend

of LBJ's, wrote, not long before Johnson died:

"Johnson expressed his belief that the assassination in Dallas had been part of a conspiracy [saying,] 'I never believed that Oswald acted alone' . . . and [his belief that] 'we had been operating a damned Murder Inc. in the Caribbean.'

This is no place to elaborate on the above, but those statements, written and spoken, by the most concerned man in the presidential procession in Dallas on Nov. 22, 1963, ought to be enough to convince anyone that the words attributed to me were neither a "big lie" nor "fraudulent misrepresentations."

-L. Fletcher Prouty

The writer was chief of special operations for the Joint Chiefs of Staff from 1955-64.

Had to Be Happenstance

In his rebuttal of President Ford and David Belin [op-ed, Dec. 24] Oliver Stone suggests that someone in the Dallas Police Department conspired with Jack Ruby so that he was in the basement of police headquarters when Oswald was brought out for transfer to the county jail.

I was one of about a score of journalists who waited that morning in the basement for Oswald to be brought out. My recollection is that there was only one way of getting into the basement garage from inside police headquarters, and that was through the Traffic Department, also located in the basement, and through the glass doors leading into the garage area—the same doors through which Oswald was brought. Had Ruby walked through that door at any time, he would have faced a barrage of cameras and newsmen. He would certainly have been identified by some, if not at all, of the Dallas journalists, to whom he was well known.

Stone also ignores the fact that Ruby, just a few minutes before the shooting, was in the Dallas Western Union office several streets away sending a remittance to one of the women entertainers who worked in his club. There is a signature and time-stamp to confirm

this. Had Ruby been under orders to kill Oswald, it would seem unlikely he would risk missing his rendezvous with Oswald by dallying in the Western Union office. It is more logical that as he walked back from the telegraph office he noticed the activity in the basement of police headquarters, which was wide open to the street, and out of curiosity walked down the entrance ramp—just as Oswald was being brought out. Ruby's presence there at that fateful moment was more likely happenstance than conspiracy.

-Jeffrey Blyth

More Propaganda

It is dismaying, though not surprising, to read that viewers are coming out of Oliver Stone's "JFK" ready to believe the worst of their government and to "buy" Stone's cockeyed theory of a broad-based "conspiracy" behind the murder of President Kennedy [Metro, Jan. 1]. Stone's pastiche of lies, half-truths and selective evidence is nothing if not convincing cinema (the same was true of Goebbels's Nazi propaganda films). Stone's loyal followers should now urge him to apply his talents for filming revisionist fantasies to other "controversial" historical events. Think of how entertaining it would be to have Stone "prove" that the Holocaust never happened, that the moon landing was faked in a TV studio and that FDR planned Pearl Harbor. I, for one, can't wait!

-Donald H. Crosby

Lonely Man in the Middle

It took 27 years, but David Belin, writing with Gerald R. Ford, has finally said one thing with which I agree: Nigel Turner's A&E network series "The Men Who Killed and exploitation of that great tragedy are both very, very bad ["Kennedy Assassination: How About the Truth?" Kennedy" and Oliver Stone's current commercialization

justification, his book "On the Trail of the Assassins. Oliver Stone's script, which is based on former New Orleans district attorney Jim Garrison's fantasy of selfstroy him and his movie. I gave reporter George Lardner nonexisting "establishment" press-CIA conspiracy to de-I am responsible for what Stone has converted into a
