Deerge Lardner, newsroom Washington fost 1150 15 St., LW Washington, D.C. 20071 Dear Goeffe,

I've taken your suggestion and written the Times-Picayune. I asked them to cut it to suit themselves in a separate letter and offered any documentation they may request. Lil is totyping it. - plan to enclose my letters to Tone and from and to house mouse.

I'm glad to have the annotated copy of Garrison's book. I do wish you return those things that are my work product, as it is called. If I'd had those Tramp" pictures I'd have been able to enclose xeroxes to make it clear that the men were not handcuffed and the officers had their pistols holstered. Can'll time from the shadows.

I would appreciate it you would please return those things I've asked you not to use. All you have to add is anddress an envelope and enclose them, and that takes little time. I hate to keep after you about this and I hate the delay for which there seems to be no need or reason.

If in the FOIA records I gave you there is the FBI Dallas report on those "tramp" pictures I triggered when they were misused in the King assassination, "'d appreciate a copy. I can't locate the copy - had and searching for it is beyond me now.

To help you identify it, they interviewed two cops, one Bass in the ID division, and a deputy, and they, mistakenly, put the train about a mile away.

Sincerely,

Haroll
