Dear Jim, This will be a memo to self if I indicate not to pay attention to it. Lesar has twice had to postpone coming. He is due in about an hour. Before putting the copies of my HEW memos in the folder holding that incomplete chapter, I looked at them. They are the Jordan memos. However, there was at least one long one or at least one of a long conversation with Harrey Liebergott of the HEW Boston office. The importances of that particular memo include an account of the Julie TV promo for "Closer Look" that Hunt arranged also as a Nixon promo;that Bennett stopped it because it would have hurt Nixon if used before the election; perhaps that Bennett offered to take Hunt off that job (which would have given Hunt no Mullen work at all!); and a personal account of Hunt as a person (I avoid "human being") and how easy it was to make him made over in his blatant expression of Neanderthal views. Lesar is to check his files and see if he has a copy. If he brings it I will mark this up. If he does not and if you han supply, I'd appreciate...The amount of stuff missing is greatly in excess of what I could have mislaid or misfiled. It troubles me mubh,of course, as does suspecting one who may be innocent because I have no choice. If it was not my overnight guest, it was one who knew exactly where to go for what. The current Baker-Colson ploy adds significance. Lesar has thrice called Colson's office to ask for a copy of a court papers and there has been no callback. Best, HW 7/10/74
